

What can you expect from the Ultrasound Overview & Applications Training course?

UE SYSTEMS IS PLEASED TO INTRODUCE A ONE DAY ULTRASOUND OVERVIEW & APPLICATIONS CLASS THAT WILL ACCELERATE YOUR ULTRASOUND PROGRAM THROUGH KNOWLEDGE OF ULTRASOUND, INSPECTION TECHNIQUES & APPLICATIONS FOR YOUR INSPECTORS

During this 1 day course, attendees will:

- Gain a brief overview of Asset Management and the Important role Ultrasound contributes
- Review the various predictive maintenance technologies and their strengths and weaknesses
- Attain a thorough Understanding of Ultrasound and Why it is such a useful Inspection Technique
- Look at the various applications within the plant facility and the correct inspection and test techniques using the Ultraprobe
- Understand Inspection Theory and Concepts
- Be coached on Proper Inspection Techniques
- Be given extensive case histories and Learn and practice correct data acquisition techniques in a hands-on environment for:-
 - ✓ Leak Inspections
 - ✓ Valve Inspections
 - ✓ Steam Trap Inspections
 - ✓ Electrical Inspections
 - ✓ Bearing Inspections
- Be proficient in Condition Based Lubrication
- Understand Considerations for Establishing Ultrasound Routes
- Review overall program goals, and work with an Instructor to establish a realistic timeline for the implementation of the program based on number of test points in the facility
- Wrap Up and Summary
